

93KW 125HP Isuzu Refrigerated Van Diesel 4x2 Isuzu Freezer Truck

Our Product Introduction

for more products please visit us on vehicle-automobile.com

Basic Information

- Place of Origin: China
- Brand Name: Isuzu Diesel 4x2 Truck
- Model Number: Isuzu Diesel 4x2 Truck
- Minimum Order Quantity: 1
- Price: dollar 30000-60000/unit
- Packaging Details: entire car
- Delivery Time: 5-9week
- Payment Terms: T/T
- Supply Ability: 1000

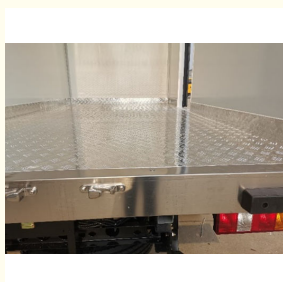

Product Specification

- Color: White
- Cooling System: Yes
- Power: 93KW 125HP
- Insulation: Yes
- Name: Isuzu Refrigerated Van
- Product Name: Refrigerated Truck
- Transmission Type: Manual/Automatic
- Highlight: Diesel 4x2 Isuzu Freezer Truck,
125HP Isuzu Refrigerated Van,
93KW Isuzu Refrigerated Van

Product Description

Isuzu Diesel 4x2 Truck

A refrigerated truck refers to a closed van used to maintain the temperature of frozen or fresh-keeping goods. A refrigerated truck is a special refrigerated transport vehicle equipped with a refrigeration unit and a polyurethane insulated compartment. Refrigerated trucks can be classified according to manufacturers, chassis carrying capacity and carriage type.

Refrigerated trucks are often used to transport frozen food (refrigerated trucks), dairy products (dairy trucks), vegetables and fruits (fresh goods trucks), vaccine drugs (vaccine trucks) and so on.

The container of sealed refrigerated truck needs to be tightly sealed to reduce the heat exchange with the outside, so as to keep the temperature in the refrigerated cabinet low. Refrigeration-added refrigeration equipment is connected with the container and provides continuous refrigeration to ensure that the temperature of the container is within the allowable range of goods. The container of the insulated refrigerated truck is similar to the container, but it is made of materials with good heat insulation effect, which reduces the heat exchange. Portable goods generally transported by refrigerated trucks are items that cannot be preserved for a long time. Although refrigeration equipment is available, it still needs to be delivered to the destination quickly.

The body of refrigerated truck is different from ordinary van, which needs good sealing performance and heat insulation effect, so as to ensure the refrigerated goods in a stable temperature environment.

Main technical configuration:

Overall dimensions: 5995×2180×2397mm, engine displacement: 2499ml, power: 93kw/125hp, 5-speed manual gearbox, ABS, fuel tank capacity of 83l, urea tank capacity of 16L, exterior rearview mirror, front fog light, daytime running light, reversing radar, central locking, electric window, multi-function steering wheel, manual. Remote control key, driving computer display screen (combination instrument), overspeed prevention prompt, brake wear alarm, automatic adjustment of brake clearance, driver fatigue alarm and oil brake.
